SUMMARY

BS Information Technology student with experience in web development, databases, programming, hardware/IoT (Arduino), and networking (Cisco Packet Tracer). Knowledgeable in technical projects, web development, and eager to contribute and grow in team and organizational settings.

EDUCATION & INVOLVEMENTS

Technical Associate | Amazon Web Services Learning Club – TUP Manila **2025 – Present**
Managed technical operations for AWSLC events and seminars

DOST JLSS Scholar **2025 – Present**

Bachelor of Science in Information Technology **2023 – Present**
Technological University of the Philippines - Manila

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, Next.js

Backend: PHP, Node.js, Express, MySQL, PostgreSQL, SQLite, Firestore, RESTAPI

Networking: Cisco Packet Tracer, VLAN & Routing, Client-Server setup (Windows Server)

PROJECTS

Movie Log

- Developed a responsive movie search and watchlist app with OMDB API integration.
- Implemented Node.js backend and localStorage persistence for seamless user experience.

Lead Tracker

- Built a Chrome extension to save, group, and manage URLs with localStorage.
- Added features for instant tab saving, group categorization, and bulk deletion.

Student Management System

- Created a PHP–MySQL web app for managing student, faculty, and admin records.
- Integrated Bootstrap UI and TCPDF for responsive design and automated reports.

Task Tide | Online Task Manager

- Designed a lightweight PHP–MySQL task manager for efficient workload tracking.
- Delivered a responsive interface with intuitive task creation and management.

Municipal Hall Office Network

- Designed and configured inter-VLAN routing for simulated office network

Client-Server Networking

- Set up communication between Ubuntu Server and Windows Server in a lab environment

CERTIFICATIONS & TRAINING

DataCamp

SQL Associate, Data Engineer Associate Certification

Scrimba

Fullstack Developer Path Certificate of Completion
